Safety

Featuring a see-through visor that allows workers to see hazards overhead, the patented AboveView Full-Brim Hard Hat is designed with a wide brim for increased protection from the elements and comes equipped with accessory slots for a variety of attachments. ANSI/ISEA Classification: Z89.1, Type I, Class E and G.

Comfort

AboveView comes with all the standard Bullard hard hat comfort features including, 3/4" seamless suspension, large absorbent cotton or easy-to-clean vinyl brow pad, Flex-Gear® ratchet suspension, and front, side, and rear vertical height adjustment settings. Like all Bullard hard hats, the AboveView is designed for users to experience the ultimate comfort while on-the-job. AboveView sits below the “nape” portion of the user’s head ensuring a secure fit and lessening the possibility of the hat falling off while working.

Style

AboveView's sleek full-brim design and see-through visor combine for a perfect fit with a look that workers prefer.

Versatility

AboveView is the only hard hat with a replaceable clear brim visor. Replacement visors are available in clear, grey and yellow tints. The AboveView is available in all Bullard standard colors and can be customized with striping and logos.

Other colors available upon request. Minimum quantity requirements apply.

Customization

Bullard uses state-of-the-art technology to imprint your company’s logo or safety slogan. Whether the design is one color or six, it can be reproduced accurately, quickly, and inexpensively. Your company’s logo can be printed in up to eight locations around the hard hat. Reflective or non-reflective stripes can also be applied to increase worker visibility. No other manufacturer offers a decoration program that’s as easy, fast or reliable. Go to www.BuildYourBullard.com to customize your Bullard hard hat.
